

# Eliptico

The recycling ecosystem  
that works.

Playa el Espino, Usulután, El Salvador.

# The Problem

Almost a third of plastic waste comes from materials with a lifetime with less than 5 years.

6.1 million tons of waste filtered into aquatic environments, with 1.7 million tons of plastic flowed into oceans.

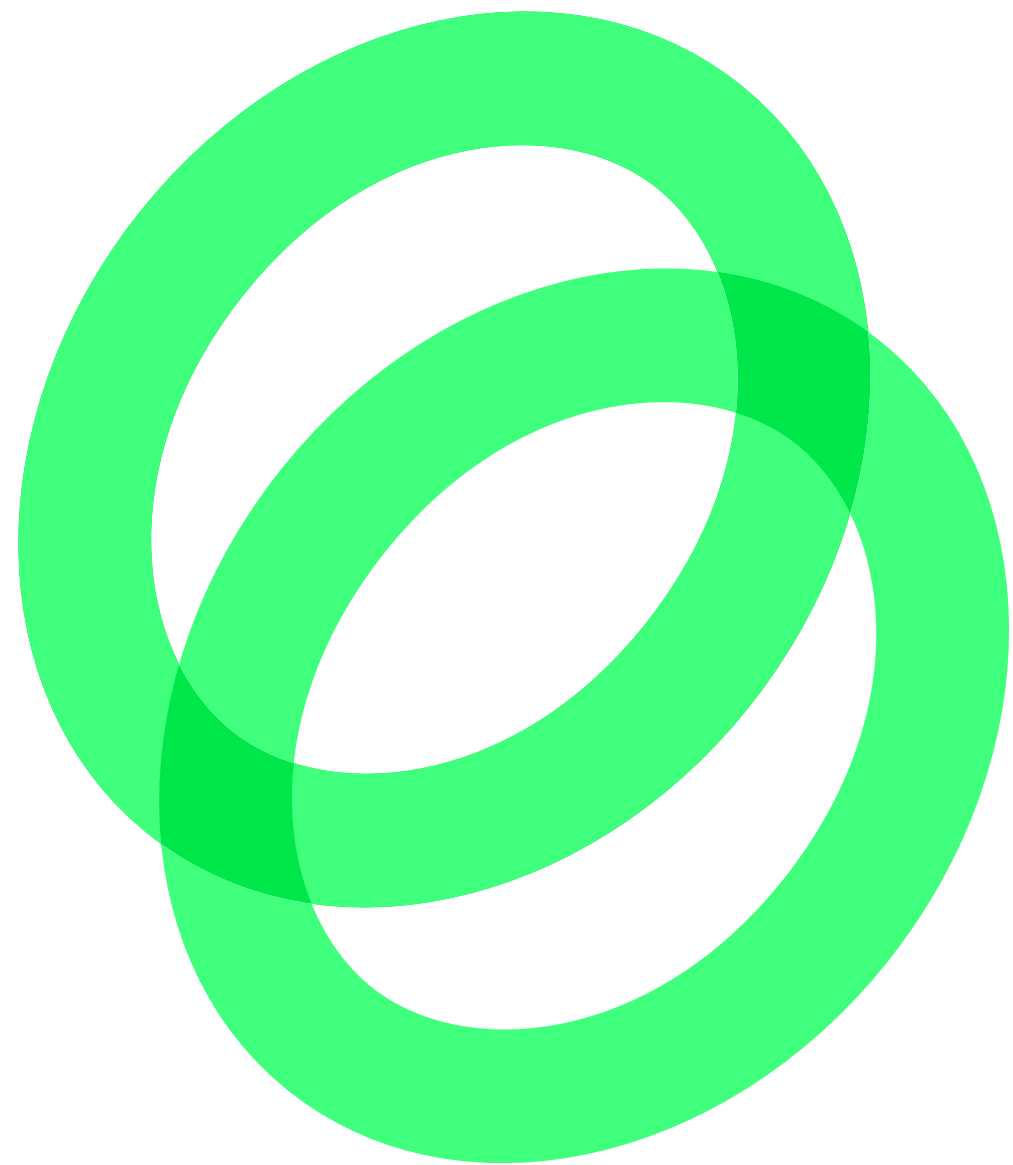

# The Problem

The lack of awareness and action taking is one of the key problems. Globally, only 9% of the world's population are recycling, 22% of the world's population isn't aware of recycling activities.

**Eliptico**

# Why Eliptico ?

Eliptico aims to develop a recycling habit on users through rewards. Any time a person throws away their can and drink bottles to one of Eliptico's Eliptic Reward Machines (ERM), they will earn tokens as rewards.

# Return and Reward System

With the Eliptico Return and Reward System (ERRS), ERT Token holders can exchange this tokens for coupons, stake them to earn more rewards or buy NFTs that they can keep or sell.

# We join the game

Eliptico is a people first elliptic-ecosystem, where users are actually the core gear that keeps the system going

We provide users a system that consists of 3 simple steps: **Collect, Scan and Earn.**

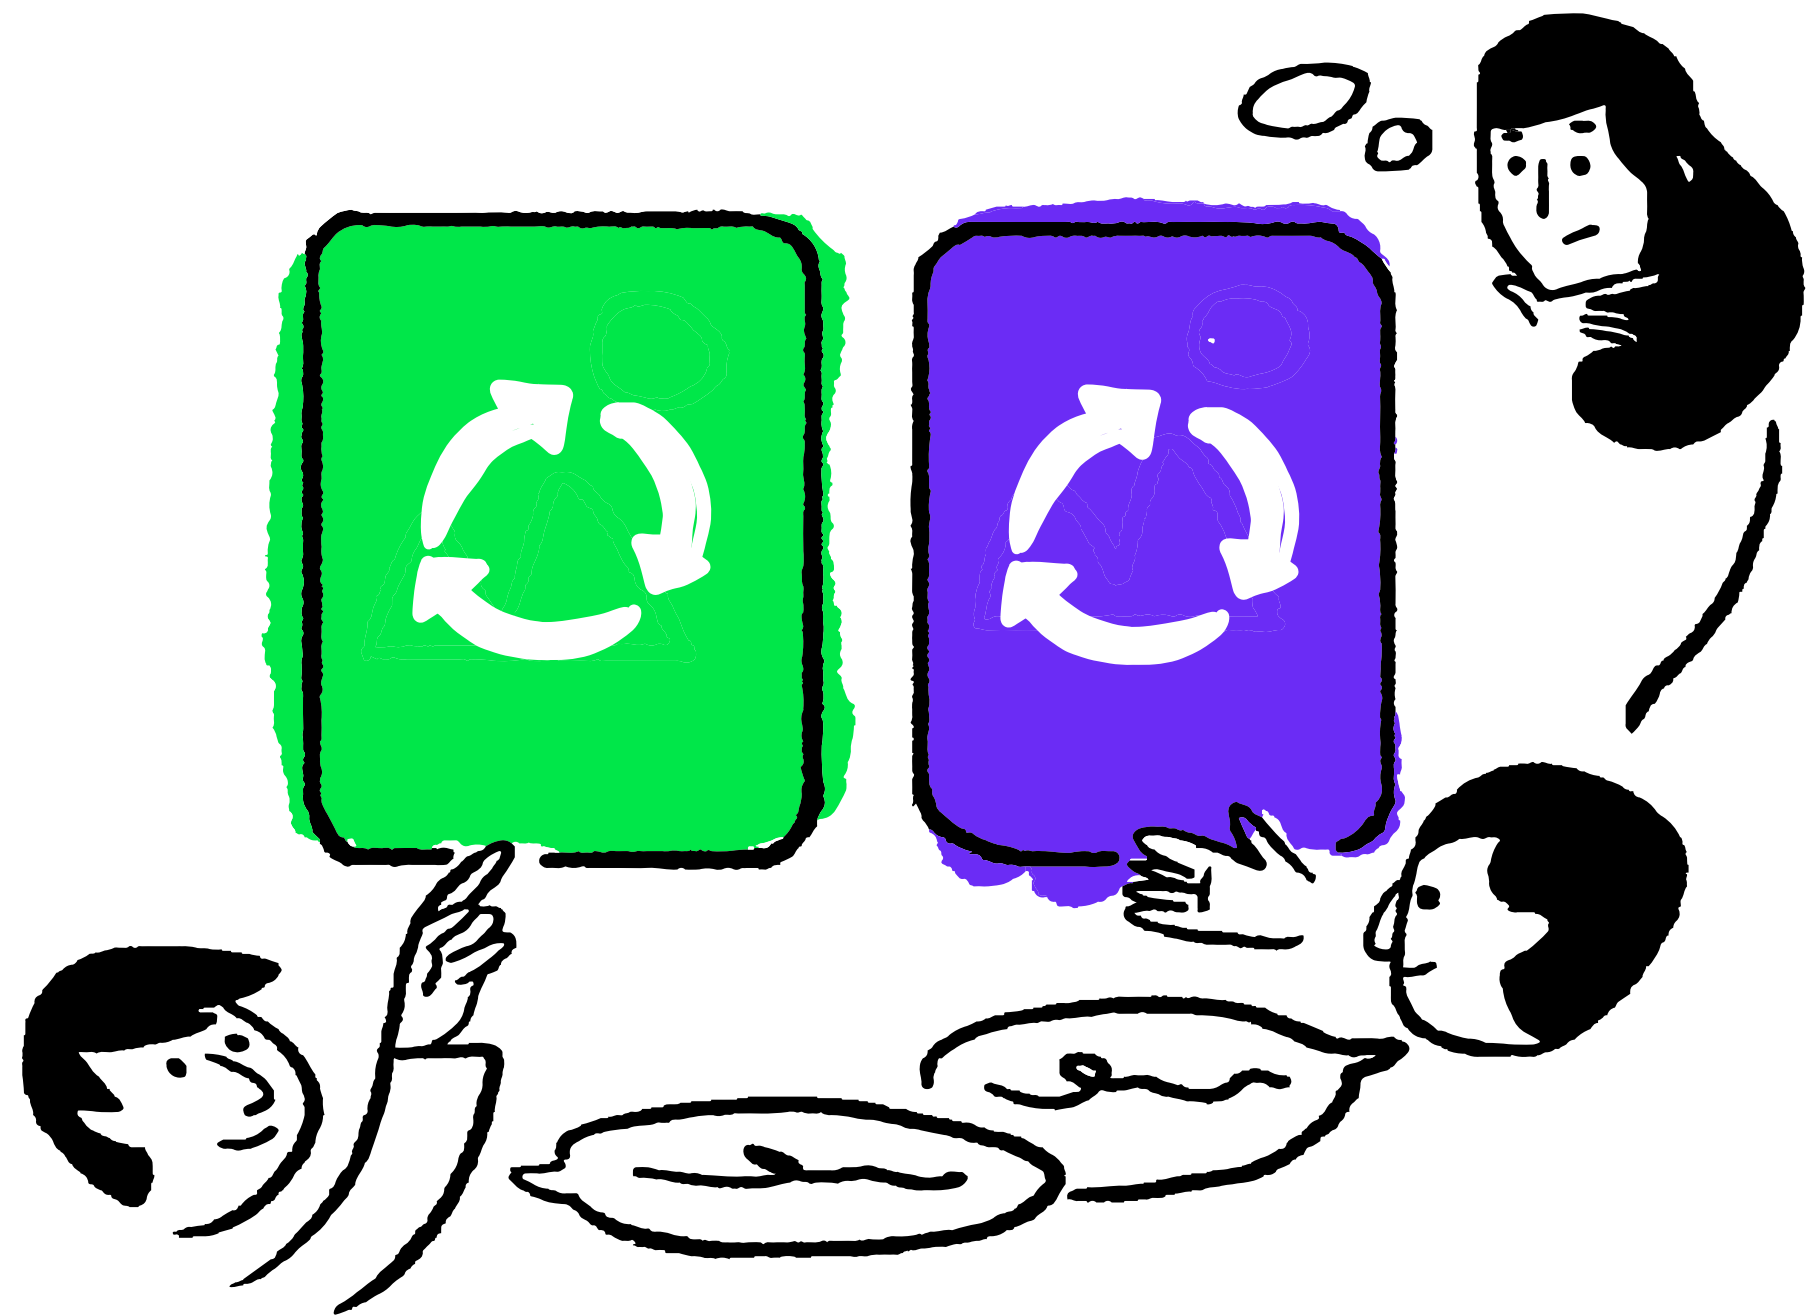

# 1. Collect

Users can take plastic waste into deposits and earn rewards.

## 2. Scan

Users can take their plastic bottles to an ERM, scan it and earn rewards.

# 3. Earn

Users can sell, send and exchange ERT Tokens for NFTs or coupons.

# Thank you!
